MECHANICAL SOUND FX SUPER, MEDIUM, and tiny

Our library of sound effects MECHANICALS includes everything you require to design and create the sound effects of mechanical processes, from simple clicks, sliding, rattling, or snapping to the most intricate mechanical processes like opening complex vault doors or treasure chests. Are you working on a project that involves massive robotics, machines, or mechs? This SFX library is the perfect toolbox. We present to you the latest essential component to your audio design tools - always in the top sound quality, which BOOM Library is known for.

MECHANICAL CONSTRUCTION KIT

MECHANICALS - A TREASURE CHEST containing more than 2.000 SINGLE Source RECORDINGS

We've included over 2.000 Single sources FX within more than 560 files to give you unlimited possibilities. Select from a vast amount of CLICKS MOVEMENTS, COMPLEX SOUND SEQUENCES, RATTLING, and ROLLING. Sliding, Springs, and SWEETENERS.

Variable sizes, many variations, and an enormous array of various machines and sounds allow you to be fully flexible in exploring a world of incredible sound effects.

SONIC CHARACTERISTIC as DRY and as CLOSE AS CAN BE.

We recorded the mechanical sound effects using only tiny reverberation spaces to give the user as much flexibility as feasible. So the dry and closed sounds are easily included in other reverberation rooms. In the end, you are able to include as much reverb in your sound as you want.

MECHANICALS DRAFTED

Create COMPLEX MECHANISMS in LIGHT-SPEED

MECHANICAL DESIGNED allows you to create amazing and intricate mechanical sound effects in only the span of a few minutes. Secret vault doors, complex vault door mechanisms, clockwork, tiny machinery drawbridges, mechanical processes of all sizes, and more. Are you unable to modify single sound files in order to create an appropriate mechanical sound? Don't worry, and we've already completed this task for you. We guarantee that these sound files will conform to your specific requirements.

DIFFERENT SOUNDS & FLEXIBLE options

MECHANICALS DESIGNED includes more than 350 custom-designed and ready-to-use sound effects separated by size (LARGE, medium, small, and TINY) in more than 96 files. Each file includes four frequently heavily alternating versions of the sound, giving you greater flexibility and fewer repetitive options for sound. The sound is encoded as WAV files with 96kHz/24bit resolution, ready to further process in the way you want.
