The pack includes Loops and One-Shots of various synthesizers and instruments. Create your own original tracks from scratch using 808 Drums, Bass, and Melodic Loops, or add FX to fill up the sound Use loops and one-shots for composition or to enhance your current work. Each song contains BPM notes, notes, instrument type, and other descriptors to aid you in locating the sample and syncing it to your project, or simply begin from scratch.

Good bangers begin with an enthralling melody. These components of the track, such as the main melody and additional FX, provide the listener with a basic idea of the plot. Some producers, on the contrary, prefer to begin with a drum beat, and only after they have a fully constructed drum set are they able to move on to build melodies, incorporating bass, and different fillers. We have created this set of drums for you to use as so that you can decide how to begin your next banger by exploring your own way. Try it!
