OZEKI NG SMS Gateway v4.16.4 (07 Dec 2018)

2024-12-18 23:02:00

You may use SMS gateway over HTTP SMS relations, the perfect platform for SMS notification, SMS paging, two-way SMS systems, or for getting an SMS service provider. SMS Service providers frequently create SMS services such as SMS Voting, SMS Banking, and SMS Games. It supports SMS API for SQL, .NET, ASP, ASP2, VB, C#, C++, Delphi, PHP, JAVA, and OEM sellers. It may be configured as an HTTP SMS Gateway for WEB SMS software, as an E-mail SMS Gateway for E-mail SMS alarms. For SMS transport, IP SMS protocols and GSM Modem AT commands are used. IP SMS protocols, for example, SMPP, supply high performance. Fantastic quality GMS modems, for example, Wavecom Fastrack, Siemens MC65, TC65, TC35, and Voice GSM modules, like the Nokia 30 and Choice 3G modems, may be utilized to run your toughest SMS software.

Install Ozeki NG SMS Gateway to find the maximum performance, availability, and security to run your toughest SMS applications. About reliability that the applications Work 24/7. It manages network connection failures, and SMS service provider failures using automatic reconnect capability, backup routing, and fail-safe load balancing. You can include message loop protection to prevent dangers brought on by auto-responding mobile messaging solutions. You could set up an Ozeki NG SMS Gateway cluster with at least two nodes to get high availability.

OZEKI NG SMS Gateway Great Features:

Install Ozeki NG SMS Gateway to find the maximum performance, availability, and security to run your toughest SMS applications.

- 500 SMS messages / second (sending and receiving)
- 100 concurrently connected software
- 64+ concurrent SMSC relations
- Support for multi-core and multiprocessor systems
- Support for 32bit and 64bit architectures
- Works in virtualized environments too (, KVM, Microsoft, Oracle, and other virtualized systems)

Regarding reliability, the applications Work 24/7. It manages network connection failures and
