**Motion Design Jump Start – Your First Typography Animation:** Welcome to a class designed for students eager to embark on their first typography animation journey. This course is an excellent introduction to motion design, animation, and Adobe After Effects.

**Throughout this class, you will:**

- Learn to animate text
- Explore animation techniques using position and scale properties
- Master the use of the speed graph editor
- Understand the application of masks in animation
- Dive into expressions for advanced animation control
- Discover a simple method for selecting color palettes
- Explore additional techniques such as backgrounds, pre-comps, and layer styles
- Learn how to export your animation for sharing in the project gallery
