

NinjaGram v7.9.2.7

2025-03-05 10:40:44

is an elaborate automation tool built for Instagram that lets users expand their accounts rapidly through safe automated operations. The tool provides automated capabilities that let users follow and unfollow people and enable them to like posts, comment, and view stories from targeted audiences, as it safeguards their account. NinjaGram allows users to perform targeted engagement by selecting followers per location and hashtags along with the followers of particular accounts or users who interact with specific posts. **NinjaGram** smoothly addresses the complete requirements from follower acquisition to user engagement boost and multi-account management.

NinjaGram protects your account security through its integrated features, including delay times, rest scheduling, and proxy management systems. A growth tracker function enables users to track their performance results through time. The application offers users multiple features that simplify effective audience interaction, such as bulk follow and unfollow auto-commenting and superliking. **NinjaGram** supplies essential Internet tools for businesses, social media administrators, and influencers to enhance their Instagram engagement effortlessly.

Key Features of NinjaGram :

1. **Auto-Follow & Unfollow** – Follow targeted users from searches, followers of specific accounts, or location-based posts. Unfollow users who don't follow back or those who followed a certain number of days ago.
2. **Auto-Like & Comment** – Like thousands of posts based on tags, locations, or specific users. Auto-comment with pre-set messages or use AI to generate relevant comments.
3. **Superlike Feature** – Like multiple recent photos from a user instead of just one, increasing the chance of gaining a new follower.
4. **Auto-View Stories** – Watch stories from targeted users to increase visibility and engagement.
5. **Advanced Targeting Filters** – Filter users based on their follower count, post activity, keywords in their bio, and more.
6. **Real-Time Monitoring** – Track hashtags or locations and instantly engage with new content.
7. **Auto-Accept Requests** – Automatically accept pending follow-up requests if your account is private.
8. **Growth Tracking & Analytics** – View charts and reports to track engagement, follow growth, and optimize strategies.
9. **Multi-Account Management** – Automate multiple Instagram accounts at once.
10. **Account Safety & Proxy Support** – Secure your account with smart delays, breaks, and proxies.
11. **Import/Export User IDs** – Easily import lists of users to follow or export usernames for later use.
12. **Image Resizer** – Resize images to fit Instagram perfectly before posting.
