Saint Regus Font Family: The story starts with Condensed, Standard & Expanded styles. Saint Regus was created and designed with a family-friendly typeface in the back of your mind. It's growing due to its unique, charismatic, and bold character. The family has a total of 8148 regular glyphs and the ability to use them in a multilingual context. The possibilities are enormous potential for designs, print and digital. Saint Regus's development tried to investigate the effects of its proportional display design.

The idea was initially based on standard weights (Roman) and later became a huge family with 21 designs that could be used for colossal design assets for every design.

What is Saint Regus Font Family?

A font family is a group of related typefaces that share common design characteristics but come in different variations. These variations can include different weights (such as light, regular, bold, or italic), widths (condensed or extended), and styles (such as serif or sans-serif). Font families are used in typography to provide a cohesive and versatile set of type options for various design and text layout needs.
