DayPilot Pro for ASP.NET MVC v2020.4.6038 (01Nov 2020)

2024-12-28 23:45:50

Library of monitoring UI parts that use the lightweight client-side part version of ASP.NET MVC and also come with an incorporated server-side backend. Works using ASP.NET MVC 4, 3, and 5.

ASP.NET MVC Scheduler: DayPilot ASP.NET MVC Scheduler is a deadline perspective of numerous sources. The cell size is flexible (1 min - 1 week). Supports drag and drop AJAX operations (moving, resizing), the hierarchy of tools (treeview), lively occasion loading (while scrolling), and other innovative capabilities.

DayPilot Scheduler is a timeline with several tools on the perpendicular axis.

ASP.NET MVC Gantt Chart: DayPilot ASP.NET MVC Gantt Chart shows a deadline to get a hierarchy of jobs. The Gantt chart shows just one activity per row. Supports links (activity dependencies), job groups, landmarks, drag and drop, mobile devices, and much more.

The **ASP.NET MVC Gantt Chart** management shows a deadline to get a hierarchy of jobs.

ASP.NET MVC Event Calendar: DayPilot ASP.NET MVC Event Calendar is an Outlook-like day/week view. Columns are customizable (any variety of days/resources). Supports drag&drop AJAX operations (moving, resizing), context menu, incorporated message pub.

DayPilot Calendar is an AJAX **event calendar** using day/week perspectives and whistles that are customizable.

ASP.NET MVC Monthly Event Calendar: DayPilot ASP.NET Monthly Event Calendar is an Outlook-like month opinion. Events can span multiple days or could be piled inside cells. Supports drag&drop AJAX operations (moving, resizing), context menu.

DayPilot Month is an Outlook-like month opinion.
