Hastasoft HTML-Editor v1.5 for Win

2026-04-08 10:56:31

The **Hastasoft HTML-Editor** is the right solution for a person who prefers to work with the code of their site and have control over it. It aims at constructing quick, safe, and reactive websites with clean HTML5 - without the utilization of JavaScript. This will render your pages lighter, safer, and more search engine-friendly. The editor also allows you to create appealing and operational web pages easily, whether you start with no templates or with the ready-made templates provided.

You may write in HTML, or you may use Markdown, which is converted into HTML automatically. The design is straightforward to use: a navigation bar on the left side assists you in the management of your files, pages, and design elements, and the main editor in the middle provides you with an effective space to code, search, replace, and view your work. You can also alternate code view with visual preview, where you can immediately view what your website looks like as you develop it.

Hastasoft HTML-Editor is made to be easy to use and easy to learn to use, and at the same time offers advanced editing capabilities. It assists you in identifying the design problems, enhancing your layout, and handling HTML and CSS snippets fast and in the same location. It is the best option in case you need a modern and responsive site with all customization possibilities without the unwarranted complexity.
