A NEW BREED OF CINEMATIC TRAILER SOUND EFFECTS

Dangerous. Relentless. Inevitable. CINEMATIC METAL TITAN takes big-screen sound design out of its comfort zone. The most innovative and unique BOOMS, HITS, BRAHMS STINGERS, IMPACTS, and lots more are included in the extensive Construction Kit and the utterly devastating Edition Designed. You will get over 12GB of crisp, stunning trailer sound effects that are available as separate components, as well as layers, processed and ready for use.

How to create distinct and multi-accented effects?

You can create a distinctive sound using "Cinematic Metal – TITAN by Boom Library".

CINEMATIC METAL - TITAN CONSTRUCTION KIT

SIZE MATTER

CINEMATIC METAL TITAN is a massive sound from beginning to end. Its Construction Kit in particular, starts with a unique quantity of kicks. While foley and more intricate applications are possible, the goal is to pull out all the guns in order to smash every slight hint of moderating into the ground.

LOCK and LOAD

Add detail to your designs using high-end metallic sound effects that are ideal for sound effects on trailers. The Construction Kit lets you create distinctive, multi-accent effects that are not just impressive in terms of scale but also in high quality, rhythm, and character. The library of trailer sound effects is particularly effective in situations in which the image doesn't necessarily generate the desired sound. However, it deserves its own mystical focus.
