

ZappySys ODBC & SSIS PowerPack Enterprise v4.1.3.10907

2025-02-26 13:07:05

ZappySys ODBC Drivers constructed using a standard that’s widely adopted by the business for quite a very long moment. This means that the vast majority of BI Tools / Database Engines / ETL Tools currently there is going to encourage native / 3rd party ODBC Drivers. Below is your little collection of the most popular tools/programming languages that our passengers service. If your instrument/programming language does not appear from the below list, so we haven't recorded usage cases but so long as your instrument supports ODBC Standard, our drivers must work well.

ZappySys Drivers such as REST API, JSON, XML -- Integrate with Power BI, Tableau, QlikView, QlikSense, Informatica PowerCenter, Talend, SQL Server, SSIS, SSAS, SSRS, Visual Studio / WinForm / WCF, Python, C#, JAVA, VB.net, PHP. PowerShell.

ODBC PowerPack is a collection of high-performance ODBC API Drivers for various API information origin (i.e. REST API, JSON, XML, CSV, Amazon S3...). Using recognizable SQL query language you can read/query info from API resources or JSON / XML / CSV Files within SQL Server (T-SQL) or your own preferred Reporting (i.e. Electricity BI, Tableau, Qlik, SSRS, MicroStrategy, Excel, MS Access), ETL Tools (i.e. Informatica, Talend, Pentaho, SSIS). You could also telephone our motorists from programming languages like JAVA, C#, Python, PowerShell, etc...

Utilizing our API drivers you'll be able to consume data from local files or link to any API data source (cloud or internal API) including Amazon AWS API, Salesforce API, Google API (i.e. Analytics, AdWords, DoubleClick), Facebook, Twitter, Zendesk, eBay and more...

SSIS PowerPack is a set of 70+ higher functionality, drag and drops connectors/tasks for SSIS (i.e. Microsoft SQL Server Integration Services). SSIS PowerPack is intended to enhance your productivity utilizing simple to use, coding-free elements to join many clouds in addition to on-premises data resources like REST API Services, Azure Cloud, Amazon AWS Cloud, MongoDB, JSON, XML, CSV, Excel, Salesforce, Redshift, DynamoDB, Google API (i.e. Analytics, AdWords), SOAP/Web API, Facebook, Twitter, Zendesk, eBay and a lot more.
