TRichView v24.1.2 & ScaleRichView v12.5.2 & Report Workshop v7.0.2 for Delphi 12-13 Florence

2026-04-24 12:07:32

TRichView is a package that consists of a native Delphi as well as C++ Builder of VCL along with Lazarus for the users and the developers along with the components of LCL for the process of displaying, printing the complicated as well as the files that are rich in text. The user can employ it to create a complex text editor and programs for helping, helping, book authoring, chats, messengers, diaries, and organizers. Encyclopedia and multimedia and a lot of other programs require a high-quality rich text editor or even a user interface hypertext. The elements can support different characters and attributes, such as subscripts, fonts, colored backgrounds of the text, and more. The documents can contain tables and pictures, images from the mist of the pictures, footnotes along with endnotes, and a few more.

The process of employing the rich text control permits the user to make an editor of RTF, which is already in order to export the files in the format of HTML as well as DocX. It is considered to be written in the language of Delphi and it does not require the external documents of DLL and ActiveX. It is not predicted under the control of Microsoft Rich edit, and even the documented version of it and the bundle contain the entire source of code for the user. It should be noted that initially, the implementation of DocX was sponsored by the software of IBE in order to make it very easy for the user to use the powerful yet altering environment that can be generated by different documents as well as formats from a single source only.

Key Features of **TRichView** :

1. It is considered a component for creating a rich text document with the mode of WYSIWYG.
2. It can provide a component for the process of displaying, printing, and, at the same time, editing complex documents that are rich in text.
3. It can make a report.
4. The components are available for working with the cameras, including the IP camera and microphone, and organizing the video chats and files.
