

locomp .Net v5.0 SP2 (10 Aug 2018) for .Net 4.0

2024-12-18 23:02:15

The locomp .NET WinForms Ultra Pack controllers were composed in C# and take whole advantage of GDI+. They create instrumentation controls with professional looks and tight integration to Microsoft's .NET Framework. Custom Property Editors offer fast-and-simple setup eliminating tough home window hunting. The Ultra Package includes 55 Instrumentation Professional Bundle Controls and also the Plot Pack Component.

locomp's Ultra Package is a package of 56 controllers for use in producing skilled instrumentation applications. These controllers are made in 100% managed code and service Microsoft and Borland/CodeGear/Embarcadero growth environments. Combines our Guru Bundle & Plot Package.

All controllers are oriented and discuss many common courses for consistency, easy to use, and interfacing. Each controller is optimized to find the best possible performance below the .Net Framework whilst still employing the innovative GDI+ drawing patterns, which greatly enhance the controls' appearance. Most controllers only need a single line of code when interfacing for a program. Each controller has an integrated customized property editor for ease of installation.

These controllers May Be Used for Scientific, Engineering, Medical, Oil and Gas, Maritime, Semiconductor, Factory Automation, Aerospace, Telecommunications, Military, Building, and Home Automation, Power Systems, Robotics, Colleges, Labs, HMI, SCADA, along with hundreds of other kinds of applications.

locomp .Net Amazing Attributes:

- Real-time, high-speed controllers.
- Professionally made to operate like real-world controllers.
- Built-In custom property editors for ease of installation.
- GDI+: Anti-Aliasing, Gradients, and added Line & split styles.
- Transparency is encouraged on all lines, fill, and gradient colors.
- Vector drawing. No static pictures that cause pruning problems.
- Worth is supported on all controllers.
- Complete code examples for many properties, methods, and events.
- All License Purchases Include 2-Year Support & Maintenance!
- Requires Contain 1.1, 2.0, 3.0, 3.5, 4.0, and 4.5 Assemblies!
- 32-bit & 64-bit Window OS's supported!
- Supported By Microsoft and Embarcadero Dev Environments!
- Royalty-Free Distribution (Excludes HMI & SCADA type programs)!
- Real-Time, High-Speed Controls!
- Professionally Designed to Function Like Real-World Controls!
- Built-In Custom Property Editors for Ease of Setup!
- GDI+: Anti-Aliasing, Gradients, and Added Line & Load Designs!
- Transparency Supported on all Line, Fill, and Gradient Colors!
- Vector Drawing. No Frozen Pictures Which Cause Sizing Issues!
- Value Interlocking Supported on all Controls!
- 100% Managed Code Compatible With All .Net Languages!
- Full Code Cases for many Properties, Methods, and Events!
- 100% Source Included With Site/OEM1000 Permit Buy!
- Many Controls Only Require 1 Line of Code to Use!
- Being Used by 1000's of Businesses Around the World!
