

SubSystems DOCX to Image Converter v16.0 for .Net

2025-06-08 16:14:12

DOCX to Picture Converter delivers a very simple and hassle-free way of switching from DOCX or text to several image formats inside your program. You may make only a few functions calls to perform the conversion.

No additional external elements or programs will be needed if you use this specific converter. The converter comprises a strong DOCX parser and pagination instrument employed by our TE Edit Control merchandise to offer you a cost-efficient, feature-rich, and powerful translator.

The converter paginates the DOCX file info into many print size webpages and then generates an Image for each webpage. This enables converting big DOCX files into a variety of equivalent size pictures.

The converter supports the following attributes:

- Support for complicated multicolumn rtf information with positionable images.
- Support for Unicode and right-to-left languages.
- Support for the vertical text from text objects and cells.
- Sophisticated table formatting including nested tables.
- **Output Image Formats:** BMP, Jpeg, Gif, Png, Tiff, Icon, Exif, and Enhanced Metafile.
- Set paper size, margins, and orientation for Picture output.
- Enlargement or diminishing of output Picture.
- Support to the arrangement area that allows for automatic sequence number generation.
- Improved support for variable-width multi-column segments.
- Support for adjoining page-number fields.
- Support for style-linked paragraph numbering.
- Control on output image resolution.

Code Output: The created Pictures can be written to a disc or it may be recovered in a memory buffer.

Programming Interface: Your program only uses function calls to perform the conversion. The Win32 and Win64 models contain the purpose and constant declaration documents for C/C++, Visual Basic, and Delphi. The item is usable in almost any environment that allows for phoning easy DLL functions.

The .NET edition of the item consists of pure C# managed code. The .NET variant may also be used inside an ASP.NET server application.
