

Winsoft Camera2 for Android v2.0 for Delphi & CB 12 Athens Full Source

2025-01-02 12:19:15

is a camera component designed for Delphi and C++ Builder on the Android platform. Leveraging the capabilities of the Android Camera2 API, this component ensures efficient and advanced camera functionality for applications. It mandates Android 5 Lollipop (API 21) or higher for optimal performance. The component is fully compatible with Delphi/C++ Builder 12, and the registered version includes access to the complete source code. Developers can benefit from royalty-free distribution rights, allowing seamless integration into their applications without additional costs.
