

Devart ODBC Driver for Firebird v3.5.1 (03 Oct 2023)

2026-09-10 11:08:28

Devart ODBC Driver for Firebird offers a reliable and user-friendly data connector, ensuring seamless access to Firebird databases from ODBC-compliant tools on Windows, macOS, and Linux. With compatibility for 32-bit and 64-bit systems, this high-performance driver integrates effortlessly with various third-party tools, including Microsoft Excel, and supports integration with IDEs such as Visual Studio.

One of the standout features is the platform versatility, allowing the driver to work with 32-bit and 64-bit applications on x32 and x64 platforms without additional configurations. The fully Unicode-compliant driver ensures proper retrieval and modification of data in multilingual Firebird databases, supporting character sets like Latin, Cyrillic, Hebrew, Chinese, and more.

It also excels in performance with capabilities like local data caching and connection pooling. Advanced data conversion mechanisms facilitate bi-directional mapping between Firebird and ODBC data types, while bulk updates streamline large data modifications to Firebird databases. The driver adheres to ODBC standards, providing full support for the Microsoft ODBC interface, functions, and data types, ensuring compatibility with all Firebird Database and Client Library versions.

Key Features of Devart ODBC Driver for Firebird:

- 1. Compatible with third-party tools for data analysis
- 2. Integrates with IDEs such as Visual Studio
- 3. Supports 32-bit and 64-bit applications on x32 and x64 platforms
- 4. Fully Unicode-compliant for multilingual Firebird databases

5. High performance with local data caching and connection pooling
6. Advanced data conversion for bi-directional mapping
7. Bulk updates for efficient large data modifications
8. ODBC conformance with Microsoft ODBC interface support
9. Compatible with all Firebird Database and Client Library versions.
