

Scallop and Diamond Patterns in Procreate

2025-02-10 16:48:47 label 我要反馈 下载页面

Scallop and Diamond Patterns in Procreate: Scallop and Diamond Patterns in Procreate" is a fantastic class for pattern enthusiasts looking to learn how to create these seemingly complex patterns simply and easily. In this class, I'll take you through my entire process in real-time, showing you how to make a scallop pattern and a diamond pattern that seamlessly repeats in Procreate and finishing touches in Photoshop.

WHO IS THIS COURSE FOR?

This course is ideal for all illustrators, artists, or surface designers at a beginner level who have a good grasp of the digital programs Procreate and Photoshop. I won't be showing you how to develop an illustration or use the tools in Procreate, how to create scallops and diamond patterns. But you will follow along with my entire process.

WHAT YOU'LL NEED:

Preferably, I will use Procreate with the iPad and Apple Pencil (to follow along exactly as I do); otherwise, I will use any other drawing tablet and similar programs like Photoshop or Affinity. And Photoshop to finalize the pattern.

WHAT YOU'LL LEARN:

- What a geometric pattern, and why they are fantastic to include in your collections.
- Examples from my portfolio.
- Inspiration for ideas that you can use to make your scallop and diamond patterns.
- How to build out your geometric shape so that it repeats seamlessly.
- My process for finalizing a scallop and diamond pattern.
