Producer Loops Trappist: Introducing 'Trappist' by Producer Loops – Your gateway to mastering the art of Trap! Unleash the impactful 808s, captivating basslines, cutting-edge synths, precise hi-hats, and mesmerizing melodies, all meticulously crafted to infuse authenticity and professional Trap expertise into your music production. 'Trappist' provides you with a comprehensive arsenal to shape contemporary Trap & Hip Hop masterpieces and elevate your sonic identity.

Comprising five construction kits, each boasting its own distinctive vibe and melody, 'Trappist' is a reservoir of inspiration and creative potential. As always, every sample is thoughtfully selected and produced at the highest quality, ensuring a seamless and enjoyable workflow. The versatility of these samples allows for use in a myriad of cross-genre productions, spanning from traditional hip-hop and R&B to Future R&B and Hybrid Trap. Blend and experiment with these sounds alongside your own creative ideas to craft music that transcends ordinary boundaries.

Compatibility: To ensure optimal versatility, we provide this package in various formats, including WAV, Ableton, Apple Loops, MIDI, REX2, and Reason Refills, enabling effortless integration.

Included MIDI Files: Similar to many other products from Producer Loops, this pack incorporates MIDI files for most musical phrases found in each kit. This feature allows you to seamlessly blend your preferred synthesizers and samplers with the sounds included in the package.

Single-hit Samples: Contained within are individual drum samples, enabling you to craft fresh beats, fills, and loops to enhance the current content. Easily load them into your preferred sampler and generate an endless variety of new rhythms and phrases.

Unprocessed/Processed Loops: For those who prefer a straightforward approach, the 'processed' files include all the effects heard in the audio demos. However, for producers who want to craft their own effects blend, 'unprocessed' loops are also provided where applicable. Not a fan of the processed loops? No issue; incorporate your own effects.
