Applications Tools

VNC Connect Server, our flagship product, is the premier remote access solution for organizations prioritizing robust security, resilience, and peace of mind. Offering secure remote access and support across multiple platforms, VNC Connect ensures high-quality connections that feel as responsive as if you were physically in front of your devices.

VNC Connect Server is fully configurable and designed for flexibility, allowing granular control over setups to meet specific needs and use cases. The software facilitates fast IT support with lightweight remote sessions that can be launched in seconds, streamlining assistance without requiring customers to install additional software.

guarantees secure and reliable access at any time, promoting organizational connectivity for enhanced productivity and collaboration. Undergoing regular, rigorous, and independent security audits, VNC Connect is secure, instilling confidence that it is a reliable choice for secure remote access solutions. Furthermore, the software simplifies setups with its consolidated approach, providing a single solution covering all remote access and support requirements, thus reducing complexity and streamlining operations.

Key Features of VNC Connect Server :

1. Remote access solution for organizations prioritizing security and resilience
2. Multi-platform support for high-quality and responsive connections
3. Fully configurable to meet specific needs and use cases
4. Lightweight remote support sessions for quick assistance
5. Secure and reliable access at any time for enhanced productivity
6. Undergoes regular, rigorous, and independent security audits
7. Certifiably secure remote access solution

8. Consolidated approach simplifies setups with multi-platform support
9. Single solution covering all remote access and support needs
10. Streamlines operations and reduces complexity
