A stunning watermark removal tool to assist you in removing watermarks, logos, scratches, dust, scratches, and other flaws from your video or photo.

- Magically remove watermarks from photos and videos.
- Add text or image watermarks to your images or text as you like.
- Multiple watermarks can be processed at the same time.

The Apowersoft Watermark Remover is a fully-featured watermark software that can process watermarks in both videos and photos in a batch. It works with nearly all the popular video and photo formats like JPG, JPEG, PNG, BMP, TIFF, MP4 MOV, MKV FLV WebM, and many more. It comes with four primary functions on its interface, including removing a watermark from the photo or video, adding a watermark to the photo, and adding a watermark to videos.

When it comes to getting rid of watermarks on photos, it comes with three tools to remove the image's watermark: a marquee tool, the polygonal lasso tool, and a brush. You can choose any of these objects and then remove them with just one click from the photos. When it comes to removing watermarks on videos, This software permits you to cut off specific areas of the video which contain watermarks and then remove watermarks from the video on your own. In place of processing the entire video from beginning to the very end, this software will drastically reduce the time required.

In addition, it is with the capability to add watermarks on photos and videos. It is possible to import images as a watermark and then adjust dimensions, transparency, and location. You can also create your logo look stylish using an integrated text editor and other settings that you can customize.
