**Cinetoools Water Flow:** "Water Flow" by Cinetoools will be the next volume of the "Nature Ambiences series. It features a wide range of water sounds captured in the natural world as it occurs, like brooks, creeks, rivers, streams, rivulets, streams, waterfalls, and streamlets.

You'll hear the sounds of small streams running through the forest, soft streams, churning brooks that flow to rolling creeks. These big fast rivers flow to rapid rivulets, raging tiny streams, splashy streamlets, massive and powerful waterfalls, and tributaries that shoot up rapidly flowing brooks and flowing lakes. A myriad of features like sparkling characterizes each sound, roaring or humming, Dribbling, and many more. The sounds were recorded using Rode NT4, Rode NTG-8, Audio Technica BP4025, Sound Devices MixPre-10T, Zoom F8, and Tascam's DR-44WL recorded from various microphone angles and distances.

In this package, you get 100 water sound effects ready for use, cleared, Royalty-Free, and 100% original, with no additional licensing charges. They have an astonishing sample rate of 192kHz/24bit to provide you with the highest quality for extreme pitch shifting and FX processing while maintaining the highest quality of clarity and accuracy.

"Water Flow can be used in any production like film, documentary, trailer or game, relaxing background music, or any type of Cinematic project that requires top-quality water recordings. You could also incorporate them for your own experimental Electronica, Ambient, Downtempo, New Age project, or any other genre you wish to play around with.

- 24-Bit/192kHz
- 100 Files/Sounds
- 90 Minutes In Total
