Blender : Chinese Buns by Kornwanast: Greetings and welcome to our course! Whether you're just starting your journey or have some prior experience, this course is tailored to meet the needs of learners at all levels. Together, we will embark on an exploration of various topics and delve into the depths of knowledge.

The central theme of this course revolves around Chinese buns. We will progress step by step, commencing with the initial model and concluding with intricate details such as patterns, layouts, lighting adjustments, camera angles, and object materials. This comprehensive approach ensures the content is accessible, making it easy to follow and applicable to future projects.

We focus on fostering independent modeling, empowering you to create unique works without rigid patterns. By utilizing essential tools commonly employed in modeling, we cover a diverse array of models, encompassing three patterns and basket shapes. Each lesson concludes with a summary of the tools covered, facilitating review and troubleshooting. Should you encounter any challenges, support is readily available through email or Instagram.

What You'll Learn:

- Mastery of essential Blender tools
- Proficiency in building a model from scratch
- Application of materials to enhance model aesthetics
- Familiarity with frequently used essential nodes in Blender

Join us on this learning journey where creativity meets technical skill, and feel free to reach out for assistance or clarification. Let's dive into the world of Chinese bun modeling together!
