You are going to be making better images very quickly!

You are probably wondering, how can this be accurate? Well, all very legitimate questions. And here's a brief answer.

I do not understand everything but I do know a thing or 2 about the ability of PRESETS.

I've found my presets work since I have tested them over recent years. I have been published countless times on the internet and in print by photography publications and stations such as The National Geographic, Digital SLR Magazine, UK, Photography week, Photography Master Class, Discovery, Photoworld China, and Digital Photo (Bauer Media), to name a few.

Among those perks of having such a wonderful clientele would be access to the many resources that they generously provide, for example, their outreach. I had been fortunate enough to check...really test that of my PRESETS work and that don't function.

That is why I call them the Magical PRESETS. They're Magical since they've been tried and tested. And they work.

Obviously, many technical preferences are based on my preference and style I've developed through time.
