

Visual ReCode v1.0.0.1055 + OEM License Key

2024-12-18 23:03:00 label 我要反馈 下载页面

Visual ReCode does not rely upon the compatibility layers or even the vents of the heritage that are available which belongs to the attribute framework of the .NET and it has the ability to rewrite the user program to a brand-new core alternative of .NET along with the functionality as well as the cross-platform flexibility which includes the new Frameworks. As soon as the user recorded the program do user does not require the Visual ReCode in order to compile it and then I'll turn it or even to set up since everything is utilizing the native core implementation of the .NET exactly and enjoys a fresh sheet of execution instead. It means that there is no third party run time dependencies without any continuing support expenses for the user and the new software belongs to the user itself. Visual ReCode will require all the important business in the Jeeps that are in the services of WCF in order to migrate into a new core .NET gRPC answer efficiently. It has the capability to migrate two types of the application of WCF from the fundamental SOAP right over the HTTP to the innovative duplex providers along with a two way communicating process between the server as well as the client which has been migrated to the conventional solution and has the capability to employ the Microsoft supported grpc.net frame for the ASP.NET Core.

Visual ReCode Great Features:

It has the following features and attributes that are stated as below such as:

- It has the capability to automatically upgrade the user application of WCF.
- It can migrate the user application to the ASP.NET Core right from the web API.
- The user has the capability to take the advantage of the performance as well as the cross-platform flexibility of the new and the modern .NET Core within few minutes.
- It has the capability to migrate as well as a grade the user source code automatically from within the visual studio.
- It is considered to be an extension of the Microsoft Visual Studio 2019 and it has the ability to provide a very comfortable and familiar environment for the user and the user team.
- It is back basically by the outstanding support which is staffed by the veteran developers of the .NET that are capable of guiding the user in order to get the most out of the visual ReCode.
