Applications Tools

Radzen Blazor Studio has powerful design tools to create beautiful, responsive user interfaces. Using a drag-and-drop editor and a WYSIWYG (What You See Is What You Get) approach, you can build pages effortlessly while fully controlling how your app looks and functions. With over 90 built-in Blazor components, you can make your apps visually appealing and responsive for any device. Radzen's advanced theming features let you customize the look with ready-made themes and color options that enhance accessibility.

Radzen Blazor Studio uses an open technology stack, meaning you can work with familiar tools like ASP.NET Core, Blazor, and Bootstrap. The generated code is clean and easy to read, and you can use free tools like Visual Studio or Visual Studio Code to run your applications. Built-in wizards and templates simplify common tasks, from setting up data connections to generating entire CRUD pages so that you can launch your projects faster without vendor lock-in.

Key Features of **Radzen Blazor Studio** :

1. Data Integration & API Support: Easily connect to REST APIs and databases like MSSQL, MySQL, and PostgreSQL, simplifying data management and making integration seamless.
2. Drag-and-Drop UI Designer: Build and customize pages visually without writing code. The intuitive design tools include a rich UI toolbox and a WYSIWYG interface for full creative control.
3. 90+ Blazor Components: Access a wide selection of open-source components designed to work perfectly with the Blazor framework, making your UI modern and functional.
4. Advanced Theming: Customize your app's look with pre-built themes like Material 3 or Fluent UI. Use predefined color swatches, including accessibility-compliant options, for a polished design.
5. Responsive & Mobile-Ready: With built-in responsive layouts and PWA (Progressive Web App) support, create apps that look great on any device.
6. Open Technology & No Lock-In: Use popular technologies like ASP.NET Core and TypeScript, and rest assured the code is human-readable so that you can modify or extend it with your preferred tools.
7. Built-In Wizards and Templates: Speed up your development with features like data scaffolding and CRUD page generation, making it easy to set up complete applications quickly.
