TexSender Pro v9.0.1

2026-05-13 10:15:01

TexSender Pro is a cutting-edge software designed for effortless Telegram message broadcasting directly from your PC, offering a comprehensive array of features for streamlined marketing campaigns. It boasts a user-friendly interface and does not require API integration, leveraging Telegram Web technology for seamless automation of various operations, including message sending and group management.

With , users can personalize messages and send them to Telegram contacts or user lists, with the option for multi-account rotation to enhance outreach. The software facilitates the import of contacts from your PC via TXT files, enabling message delivery even to contacts not in your address book. Users can choose from three sending modes: sending messages to user lists via their usernames, existing Telegram contacts, or specific groups and channels.

TexSender Pro empowers users to create and send multiple versions of messages randomly, reducing the risk of bans and providing real-time sending reports for monitoring. Additionally, it offers features such as setting random delays between messages to mitigate the risk of bans and sending messages with various attachments, including photos, videos, PDF documents, and more. Furthermore, the software facilitates group management by extracting up to 200 Telegram IDs from each group and allowing users to add members from @username lists, with the option to use multiple accounts simultaneously for larger group additions.

Key Features of **TexSender Pro**:

1. Directly send Bulk Telegram Messages from the PC
2. Bulk invite members to groups quickly and securely
3. Import Telegram contacts or @Usernames lists
4. Send text, links, images, attachments, emojis, etc.
