Stimulsoft Reports v2026.2.2 for Winforms (.Net 4.5.2 to 10)

2026-06-08 09:22:54

Stimulsoft Reports for Winforms is a full Windows Forms-based reporting solution. It enables the developers and other end users to create, edit, view, print, and export reports of any type. The package consists of a report designer that is easy to use, a customizable viewer, and a web viewer featuring ASP.NET, making the package a convenient tool applicable to both desktop and web environments.

Stimulsoft Reports for Winforms Royalty-free report designer is one of the greatest strengths; it can be integrated directly into your application with a few simple lines of code. It is based on a modern Ribbon interface, is multilingual with 40+ languages, and in-built wizards ensure report creation is fast and easy. Built-in AI functionality is also provided, aiding users in validating SQL queries, running event program code, converting Blockly code, and making sure that they design reports free of errors.

The interactive report viewer is quick, can be customized, and has advanced features such as drill-down, parameters, and interactive report viewer. Reports are easy to share through email or via social media, and integration with your project is easy using C#/VB.NET. Reports.NET is a versatile reporting tool that is future-proof with support for various data sources, over 40 export formats, and complete compatibility with the .NET Framework as well as the .NET Core.

Key Features of **Stimulsoft Reports for Winforms**:

1. **Rich Report Components** – Add text, images, tables, charts, formulas, and even 3D graphics to your reports.
2. **AI-Powered Assistance** – Automatically check SQL connections, validate code, and convert scripts with the Stimul AI assistant.
3. **Multi-Platform Support** – Works with WinForms projects, ASP.NET applications, and supports .NET Framework, .NET Core, and .NET 5/6+.
4. **Flexible Report Viewer** – Fully customizable, supports themes, parameters, interactive reports, and drill-down navigation.
5. **Data Connectivity & Export** – Connect to a wide range of data sources and export finished reports to over 40 formats.
6. **Easy Integration** – Just a few lines of code are needed to embed the designer or viewer in your application.
7. **Report Sharing** – Send reports via email or share directly with business partners and colleagues.
8. **Learning Resources** – Access documentation, tutorials, and a library of ready-made report templates.
