Whperfectlys class will include step-by-step instruction using After Effects; it's much more than the basics. I'll go over the process behind the methods used to make you think like a motion designer and allow you to apply these concepts to your next project.

At the beginning of this course, we'll discuss the theoretical aspects of creating looping animations and the best methods.

You'll learn:

- The distinction the looping animated gifs from GIFs
- When and where to utilize different file formats and when to use them.
- how to design your loop
- how do you determine how long your loop will be
- Best techniques for looping animations
- How to ensure that your loop is smooth (and what it means)
- Best practices for working with GIFs
- We'll then dive into After Effects to animate a looping underwater scene. You can download a part animatable After Effects file (from the "Projects and Resources" tab) to concentrate on making the animations loop. You'll be taught how to:
- Use various loop expressions (no prior experience using expressions is required!)
- Include overlapping action/follow-through in looping animations
- loop a composition
- offset looping elements in scenes
- ensure that each element within a scene runs in a perfect loop
- render a video file
- render a .gif file

What is Looping Animated Scenes in Adobe After Effects?
