Devart MySQL Data Access Components (MyDAC) Professional v11.0.2.0 for D11 Alexandria & v10.4.1 for D6-D10.4 Sydney Full Source

2026-09-28 22:48:44

MySQL Data Access Components is described to be a library basically for the components that are capable of offering a very direct access to the MySQL as well as the Maria DB right in the Delphi just like the Community Edition and in addition to the Lazarus which is a free Pascal on the Linux, windows, iOS, Mac OS, and finally Android. The programs of the MySQL data access component are capable of connecting directly to the MySQL server or even employment through the MySQL client Library. MySQL data access component is described to be intended in order to help the developers and the users to develop cleaner as well as a quicker database software of MySQL. It is a complete substitute for the conventional MySQL along with the connectivity option and has the ability to pause an officiant alternative in order to get the drivers as well as an access to the MySQL. It is based on the application of DB and it is very easy to be deployed and it doesn't require the process of installation of other data providers as well as layers by the user. This is why they are capable of working faster compared to the ones that are based on the standard of data connectivity solution.

Devart MySQL Data Access Components (MyDAC) Professional Great Features:

It has the following features and attributes that are stated as below such as:

- It has the ability to provide a direct access to the data server without even having to use the client Library. It does not require the process of installation of other data providers as well as layers.
