**Crash Course in Technology Mockup Design:** Graphic design with vectors and conceptual technology art is highly challenging. Learning techniques and tools to create convincing designs for physical products can be quite a problem. It is, however, an extremely sought-after skill.

What we'll be doing in this class is helping you move from the level of knowing what you need to do to create this iPhone conceptual layout from scratch. We'll teach you straightforward methods and tools and show you how to utilize them.

After this course, you'll fully comprehend the most effective tools for the graphic design of technology concepts. Design. When and when to utilize every tool.

You'll be able to create your vector design using Affinity Designer to a level suitable for commercial use, and you can even lease your new expertise to clients.

### You will learn the following:

- Gradient shading
- Clipping Masks
- Perspective techniques
- Splice Shape Creation
- Shaping Nodes
- Creating Lighting Reflections
- And Much More

If you're brand new to Affinity Designer or have been here before, there's something for you to learn about the new ground with the most up-to-date techniques of vector design for practical applications.
