

On-line creating and integrating online forms into your website is a breeze. You can create customized forms quickly, even without HTML knowledge or the need for PHP or CGI scripts on your web server. The **Pro version** allows you easy configuration of columns, fields, and settings and includes integrated templates for standard forms. Special forms include field calendars, signatures, and date input fields can be added with a single click.

One of the standard features of **D-WFormMaker** is its capable upon-submit checks, which prevent users from blanking out your forms. This helps reduce errors and safeguards your online forms from spam abuse. Additionally, the tool offers flexibility in form design and email customization, allowing you to take the form appearance and email notifications according to your website's needs.

**D-WFormMaker** form generator simplifies the creation of online forms, making it suitable for businesses, associations, or individuals with an online presence. The built-in wizard guides users through three simple steps to create professional web forms for contact inquiries, appointment bookings, or reservations. The **Pro version** allows for creating multi-page forms, ideal for organizing extensive form fields, such as surveys or application forms, into manageable steps.

**Key Features of D-WForm Maker:**

1. Quickly create online forms with ease, requiring minimal HTML knowledge
2. No need for PHP or CGI scripts on your web server
3. Customizable columns, fields, and settings via the program interface
4. Special form fields like calendars, signature fields, and date input fields are available
5. Integrated templates for standard forms streamline the creation process
6. Capable upon-submit checks prevent users from blanking out your forms
7. Flexible form design and email customization options
8. Easily integrate forms into your website with an installation wizard or FTP upload
9. Specify multiple email addresses to receive form submissions
10. Allows for the creation of multi-page forms, ideal for complex forms like surveys or applications
