

## Paper Doll Self Portraits

2025-02-10 16:47:17 [label](#) [我要反馈](#) [下载页面](#)

**Paper Doll Self Portraits:** In this class, you will create self-portraits that resemble a paper doll artwork in Procreate; you'll learn various techniques to add depth and impact to your art.

In the course, you will be taught how to design forms that reflect the distinctive characteristics of your cutouts made from paper. In addition, I will walk you through the most critical techniques to use using Procreate to allow you to incorporate these stylistic elements:

- **Stylized drop shadows** Learn how to create drop shadows that resemble the look of actual paper lifting in weird ways. Shadows like these will give an illusion of three dimensions to your art.
- **Isolated flat and textured shading** Learn how to apply flat and textured shading techniques to increase the perceived quality on the page, with various techniques for shading that enhance the depth and dimension of your paper doll designs.
- **"Torn paper" edges:** Explore the process of creating paper edges that provide those paper dolls realistic and tactile appearance. These edges can contribute to the authenticity of your work.
- **Drawing using irregular shapes** Take advantage of the skill to draw imperfect shapes to create a hand-cut appearance. This technique can enhance the uniqueness and charm of your illustrations for paper dolls.

In addition to these essential methods, the course will also cover other important techniques and tricks to assist you in mastering the process of creating Procreate. After the class, you'll have the skills and knowledge to create stunning illustrations of paper dolls that show depth, texture, and imagination.
