Moody Dark Room - Moody Film Preset Pack:

Dynamic Pine Biomes is a custom-made asset pack created in Blender designed with gamers in mind. The pack allows you to create complex terrains and landscapes with minimal performance impact, which is handy when dealing with intricate vegetation in Blender. Avoiding crashes and lag is the primary focus, so optimizing the assets and supporting large-scale environments become essential, especially with the procedural scatter system and customizable biomes included in the pack.

Includes:

Customizable Biomes

- Forest, Edge, and Meadow biomes allow for further and broader variation.
- An extra biome dedicated to distance trees is perfect for large landscapes.

Procedural Scatter System

- Geometry nodes allow for easy placement of trees and shrubs on any surface.
- Vegetation can be distributed across any surface with a few simple clicks.

Optimized Assets

- gorgeously crafted for accurate and efficient Cycles and Eevee rendering.
- The assets are made to ensure a high-performance viewport and optimized scaling rendering.

Dynamic Landscape Material

- Materials that are highly flexible and perfect for sculpting landscapes.

Forest Cliff & Rock Collection

- A diverse collection of small rocks and enormous cliffs for environmental detailing.

GeoScatter Support

- It works with GeoScatter 5.4 and includes pre-built amazing biomes.
- Performance Tips and Workflow Enhancements
- Concise steps aimed at enhancing rendering and viewport performance.
- Vertex paint-based biome masking is easy and effective.
