ag-Grid Enterprise v35.1.0 (11 Feb 2026) Retail

2026-03-13 15:25:22

ag-Grid Enterprise stands out as a fully-featured and highly customizable JavaScript data grid, offering exceptional performance without relying on third-party dependencies. This grid integrates with major JavaScript frameworks and goes beyond the standard feature set in typical grids.

Noteworthy features include versatile column interactions such as resizing, reordering, and pinning and essential functionalities like pagination, sorting, and row selection. What sets ag-Grid apart are its advanced capabilities, including grouping and aggregation, accessibility support, custom filtering, in-place cell editing, lazy loading of records, and server-side record operations. The grid supports live stream updates, hierarchical data structures with tree view, and offers customizable appearance and cell content.

is not just a data grid; it's a comprehensive solution for developers building enterprise applications. With outstanding performance handling millions of rows and thousands of updates per second, it delivers the expected features like cell editing, transactions, aggregation, row grouping, clipboard support, server-side row model, pivoting, column filtering, and data export to Excel. Additionally, **ag-Grid Enterprise** boasts a fully integrated suite of charting tools, allowing users to visualize their data seamlessly.

Key Features of **ag-Grid Enterprise** :

1. Fully-featured and highly customizable JavaScript data grid
2. Outstanding performance with no third-party dependencies
3. Seamless integration with major JavaScript frameworks
4. Column interactions: resize, reorder, and pin columns
5. Pagination, sorting, and row selection
6. Grouping and aggregation
7. Accessibility support
8. Custom filtering
9. In-place cell editing
10. Lazy loading of records
11. Server-side record operations
12. Live stream updates
13. Hierarchical data support with tree view
