

Microncode CSVideoPlayer v1.0.3.0 (21 Apr 2020)

2024-12-18 23:02:00

The Microncode CSVideo Player is also described to be a library of the .NET which has the ability to permit the users and the developers in order to play different kinds of video files that include the MP4, FLV, AVI, MOV, MKV, VOB, WEBM, WMV as well as 60+ video formats even from the user app that are ready for the process of utilizing the C# as well as the .NET Center along with the VB .NET Length. This particular library has the ability to rely on the libraries of the FFmpeg and it offers the users the power and the ability to perform any video as well as a sound file without the need for installing any particular codecs on the user system and machine. With the help of Microncode CSVideo Player it is even possible to open as well as receive the entire information about the media file in order to play the tags of the ID3 so that the user has the ability to play, pause, stop as well as resume the procedure how to get as well as set the place to be played. Turning as well as rotating of the screen, at the same time playing with the video in the display which is complete and a lot more with the help of a couple of lines of code.

The benefits of the Microncode CSVideo Player are stated as below:

- It does not require any codecs to be installed by the user on the user machine and server.
- It has the ability to play different types of video files in the user program.
- It is based on the library of FFmpeg.
- It permits the user and developed developer to get the entire information about the source of the file.
- The process of playing, resuming, stopping the process of playing as well as pausing can be done by the user.
- The user can flip, rotate, and even display.
- It permits the users and the developers to play on the full screen.
- It has the ability to provide high-quality results to the users.
- It has a lot of relevant events.
- It is very easy to use.
- The user has to import the library immediately to the program and start the work.
- It can save a lot of time for the users and the developers.
