TMS Async v2.4.7.0 (01 Apr 2026) for Delphi 7-12 Athens Full Source

2026-04-23 09:38:11

TMS Async delivers asynchronous serial communications tailored for Windows VCL applications. With a diverse array of components, it is a vital tool for software-reliant on Windows COM ports.

A rapid, non-blocking, multi-threaded buffering RAD component architecture ensures efficient read and write operations. Furthermore, it boasts built-in support for XModem, YModem, and ZModem protocols, enhancing its versatility for data transmission.

Additionally, features a terminal component equipped with an extensible emulation interface, further augmenting its utility for diverse communication needs.

Key Features of **TMS Async** :

1. Asynchronous serial communications for Windows VCL applications
2. Wide range of included components
3. Essential for software utilizing Windows COM ports
4. Fast, non-blocking, multi-threaded buffering RAD component architecture for read & write operations
5. Built-in support for XModem, YModem, and ZModem protocols
6. Terminal component with extensible emulation interface
