Syncfusion Essential QTP (Quick Test Professional) v20.4.0.38

2025-01-01 22:49:34

UFT (formerly called HP Quick Test Professional - QTP) is an automated test software developed to test different environments and software programs. Syncfusion offers QTP add-ins with custom libraries that allow UFT and QTP to recognize Syncfusion controls. Custom libraries are created by using the .NET add-in extension.

Essential QuickTest Professional can be an additional program with Essential Studio products offered by Syncfusion. It is specially developed to meet the needs of professionals testing the software developed by using Syncfusion controls and HP QuickTest Professional software. Essential QuickTest Professional includes custom libraries that aid in helping HP QuickTest Professional application or UFT software recognize Syncfusion controls. Custom libraries are developed using QuickTest Professional .NET add-in extensibility. For more details, refer to HP QuickTest Professional help.

The custom libraries permit Syncfusion controls to function as native objects within QTP. QTP testing environment. This allows for the testing of apps in QTP. The essential QuickTest Professional helps you perform regression tests on your application which contains Syncfusion controls, and thus increases the security of the final product. The following chapters will demonstrate how to use the custom library within QTP.

This section will cover the prerequisites that must be met to install Essential Test Studio. It also lists web browsers and operating systems compatible with the program.
