**Let's punch this in mind:** Punch Holes! Initially, they had been used to indicate the end or the start of an analog picture roll. We left them fancy overlays that instantly give your footage an analog and natural feel. We love this feeling!

That is why we sat down with several film rolls along with a scanner and shattered and scanned them to departure. Simply use them as elaborate prescanned overlays. But we did not stop there, we assembled a few ill and artsy alterations for easy and simple use in your endeavors.

### HANDMADE TEXTURES SCANNED FROM REAL FILM

We ruined several feet of film to get all these alterations. We experimented a lot with various means of mutilating movie material and with the support of a high-heeled scanner we revived the ripped-off movie alterations by hand. Each framework is a distinctive scan of a bit of ripped or cut film.

### Not only a TRANSITION PACKAGE

This package is obviously based on our amazing transitions. Nonetheless, it includes 15 punch-hole cartoons, 15 punch-hole overlays, and 3 exceptional Film Burns. They're pre-keyed and predicated on easy drag-and-drop and mix modes. You may use them to conceal pieces of your footage, make your own adjustments, or just add more texture to your job
