- Other options and features

### How to change the graphics card for the plugin to work (Windows only)

1. Open the Windows Registry Editor (regedit.exe): press Window+R, type "regedit", click OK.  
Find the plugin path, for example, Retouch4me Dodge&Burn:

HKEY\_CURRENT\_USER\SOFTWARE\Retouch4me Dodge Burn

2. Find the ailayersFlags attribute.  
If the attribute value is 0, the most powerful graphics card will be used,  
A value of 1 includes the second most powerful graphics card, 2 - the third, and so on.
3. Restart the program.

### What is Retouch4me Dodge & Burn?

Retouch4me Dodge & Burn is a photo retouching software designed to assist photographers and retouchers in enhancing portrait and beauty images. The "Dodge & Burn" feature in this software is a reference to a common photo retouching technique used in image editing to adjust the brightness and contrast of specific areas of a photo, typically used for skin retouching.

By selectively applying the Dodge & Burn technique, you can create a more polished and balanced appearance in your portrait photos. Retouch4me Dodge & Burn likely offers automated tools or presets that simplify the process of applying these techniques, making it easier and more efficient for photographers and retouchers to enhance their images.
