Recogniform OMR (Optical Mark Recognition) SDK for Delphi

2024-12-18 23:01:31

Unlike several other marketplace alternatives, the OMR *(Optical Mark Recognition)* recognition engine manufactured by Recogniform Technologies SpA permits using two surgical parameters, assessing the existence of ink amount and the signal mesure right into the box.

Recogniform OMR Amazing Attributes:

Ability: our OMR (Optical Mark Recognition) engine lets you comprehend assess boxes, published with blind ink or not.

Truth: OMR recognition engine precision is nearly 100%, even in not superior quality typed and scanned pictures. Despite low-quality pictures, the error rate is meager.

Tech: our motor relies on an exclusive dual evaluation: ink percent and signal extension. This permits achieving extraordinary outcomes compared with all OMR motors available (mainly based on ink percent).

Rate: rate is connected to CPU rate. Using Pentium IV chips, you can realize a 600 test boxes page in under 0.5 seconds.

Input: monochrome bitmaps.

Output: output is composed of ink percent and signal extension worth.

Platform: all the Windows programs are supported.

Packaging: the motor is packed in DLL format.

所有软件资源 100%安全 已检测 无病毒 无篡改
