- Big Explosions Part 2

What is CartoonSmart – Tradigital Animation 2D FX?

"Tradigital" is a term used to describe the blending of traditional (analog) and digital techniques. In animation, it means combining classic hand-drawn animation principles with digital tools and workflows to create visually appealing effects.

"2D FX" stands for 2D effects, which are the various visual elements and animations used to enhance the overall look and feel of a 2D animated project. This includes explosions, smoke, water splashes, magical effects, and more.
