How To Film Online Lessons: Hey there, I'm Harry, and I've been creating online lessons across various platforms like University Courses, YouTube, Patreon, and Instagram. Whether you're a musician or a creative looking to step into online teaching or just seeking to enhance your video production skills, this course is for you!

Over the years, I've received numerous inquiries from people wanting to "up their game" in video production, so I've compiled a wealth of knowledge and practical tips to help you do just that.

In this course, we'll cover:

- Selecting the right camera and lights for your needs
- Optimizing camera settings for top-notch video quality
- Lighting techniques tailored for shooting behind a drum kit
- Understanding audio equipment and making the right purchases
- Exploring free and paid video editing software options
- Choosing the best platforms for uploading your content
- Using audio presets for high-quality sound in Logic and Premiere Pro
- And I'll even share insights into my setup and workflow

I aim to provide valuable insights and practical advice on all these topics, empowering you to make informed decisions regarding equipment and video production. The world of video can be daunting, but together, we'll make it more approachable and less intimidating.
