ZETPDF THE FASTEST PDF SDK FOR .NET APPLICATIONS Create high-performance .NET Software Being Able to Create, Edit, Convert, Protect, or Printing PDF Files, without Needing Adobe Acrobat.

ZetPDF is a .NET SDK for incorporating PDF print and render service in .NET software. It includes a PDF viewer control for Windows Forms, WPF, Silverlight, and a .NET library for producing and printing PDF documents from any .NET program. The PDF viewer controller includes support for annotating PDF documents, bookmarks navigation, removing and adding file attachments, and other capabilities.

The toolkit contains its PDF rendering engine, and it doesn't rely upon any other applications for producing and printing PDF files. ZetPDF toolkit was developed completely in C#, being 100% managed code.
SDK comes in two distinct variants, WinForms and WPF & Silverlight. Besides, we encourage .Net Core.

ZetPDF Amazing Attributes:

Read, see and modify records in the widely-used PDF format variant.

Composed entirely in C#, it's a 100 percent .NET part, not only a COM wrapper.

Annotate PDFs with links, text, sketches, or add complex binary objects to your PDFs.

Complete AES256 cryptography ensures high-quality protection to your files.

Search, infusion, emphasize -- a few of the very commonly-requested capabilities.

Produce, compose, browse acrofields (form fields).

- .Net Core assistance
- ASP .NET service
- Quick rendering engine(ARM/64, x86/64, MIPS)
- Text investigation, text extraction
- Multiple page design
- Thumbnails view
- Table of contents studying.
- Text selection and clipboard service
- PDF decryption(3DES, AES128, AES256)
- Open from the file system or flow selection.
- Text reflow rendering(ebook design)
- Text annotations
- Handwritten annotations
- Geometric primitive annotations
- Multimedia annotations
- Hyperlinks service
- PDF permission manipulation
- Re-save annotated/modified PDF
- PDF form fields studying
- PDF form fields production
- Straightforward page manipulaiton(insert text, add picture)
- PDF page manipulation(make, move, rotate, etc..)
- Table of contents manipulation

- Metadata tackling
- Save new encrypted PDF.
