Sistema Fenix UniSF Component for UniGUI v1.1.1060 Retail

2026-09-30 18:11:33

UniGUI manages the icon's alignment. This demo uses the version that was built according to the data at the footer. UniSFComboMultiple / UniSFComobobox presents an error in UniGUI with ExtJS. This occurs when you use the form show modal or show modal.

The user closes the form leaving the list open. The UI developer is trying to help us by keeping compatibility.

Sistema Fenix UniSF Component for UniGUI Great Features:

This component contains several styles similar to the bootstrap and can choose more than 1480 icons.

Note: As the buttons are a theme, they are only compatible with the standard ExtJS themes (default, gray, blue, access, and Neptune); the extra unique themes are customizations, totally changing the structure and naming of classes and properties, making it impossible compatibility with other customizations.

This component makes it possible to shoot questions with animation and with a beautiful look.

This combo has the feature of search in the list, multi-selection, and list option with the group.

Various styles of labels to improve the look of your application.

Display messages elegantly on your system; it has more than 700 icons.

Use this screen to lock the system while running a routine that takes some time.

Add badge on your buttons, great to identify the number of messages, calls, etc.

Add an elegant tooltip(hint) to your application.

Add security to your application by preventing robot attacks.

Include professional charts in your application.
