There are two actions: JPEG and PNG Overlays. The main difference between Overlay Action JPEG and Overlay Action PNG is that JPEG uses the Screen Blend Mode.

- The Photoshop dialog box appears and asks you to choose the image. Browse and locate the folder you have unzipped, and then select the photo you like. The image will be immediately uploaded into the Photoshop file, where it is displayed.
- Reflect, scale, or rotate the overlay if you'd like
- Enter the CMD (Ctrl) or Enter, and the operation will generate the layer mask and two adjustment layers. If needed, use a black brush to the layer mask to obscure the image; then, in the correction layers, you can adjust the Levels or color so that the overlay appears suitable for the image.
