Cube - Bootstrap Admin Theme + AngularJS

2026-04-08 12:05:36

Cube Bootstrap 4 Theme

CSS:

- Theme includes SASS version (SCSS) and also compiled css filed.

- SCSS folder includes only SASS version with CodeKit config included.

- LESS folder includes only LESS version with CodeKit config included. It’s port from SCSS version.

- CSS folder includes compiled SASS version for deployment.

CSS Styles (in css folder):

- The /compiled folder includes all major styles of the theme.

- The /bootstrap folder includes the bootstrap files. Bootsrap libs are not changed.

- The /lib folder includes the styles for the plugins.

- Added classes .hidden-xxs and .visible-xss for showing/hiding content on 420px's devices and smaller.

SCSS & LESS Folder:

- Bootstrap folder includes Bootstrap SASS (or LESS) version.

- Theme folder includes thw whole theme files, which should be self explanatory.

Scripts:

- Javascript code for every page is located at the end of each html template file, so you don't have to include all plugins for every page.

Icons:

- FontAwesome icons

- Glyphicons - if you move the location of bootstrap files, you need to change the relative path to icons in it.

Html:

- indexTEMPLATE.html includes empty template without content in the main content area.

- all other files includes content based on each type.
