Mitov CommunicationLab v8.0.0.142 for Delphi & C++ Builder 12 Athens Full Version

2025-05-23 20:36:53

The includes tools that help simplify the making of communication-oriented applications. Using Delphi, C++ Builder, Visual C++ or .NET, you can use this package to help build more powerful systems with less coding. If you're a developer managing complicated data flows and looking for visual, drag-and-drop tools in OpenWire, it's your ideal solution.

Customers can choose package versions, including VCL/FireMonkey for RAD Studio, MFC for Visual C++, and .NET 4.0+ for Visual Studio. Each edition offers strong performance, and because the architecture is the same, transferring code created from one location to another is simple. Because of this, **Mitov CommunicationLab** is perfect for building apps across platforms and completing projects faster.

Key Features of **Mitov CommunicationLab** :

1. **Multi-platform support:** It works seamlessly with Delphi, C++ Builder, Visual C++, and .NET (C#, VB.NET, F#, etc.) on 32-bit and 64-bit systems.
2. **Three development editions:** Available for RAD Studio (VCL/FireMonkey), Visual C++ (MFC), and .NET 4.0+ (managed components).
3. **Consistent component architecture:** Components behave the same across platforms, allowing for easy code reuse and project migration.
4. **Built-in OpenWire integration:** Supports visual programming for complex data streams with almost zero lines of code.
5. **High-performance communication processing:** Engineered for fast, reliable, and efficient data communication between components.
6. **Supports modern development environments:** Compatible with RAD Studio 10.3+, Visual Studio 2005 and newer.
