Winsoft Optical Barcode Recognition for FireMonkey v3.9 for Delphi & CB XE2-12 Athens Full Source

2026-08-31 13:49:17

is a powerful barcode recognition component designed for Delphi and C++ Builder developers. Built on the ZBar barcode reader library, it provides seamless integration with FireMonkey applications, enabling efficient barcode recognition across various platforms.

This versatile component supports a wide range of barcode symbologies, including EAN-13/UPC-A, EAN-8, UPC-E, Code 39, Code 93, Code 128, Codabar, GS1 DataBar, GS1 DataBar Expanded, Interleaved 2 of 5, SQ Code, and QR Code. Whether on Windows, macOS, Linux, iOS, or Android, developers can rely on this component for accurate barcode recognition.

Compatible with Delphi/C++ Builder versions XE2 through 12, Winsoft Optical Barcode Recognition for FireMonkey offers broad accessibility across different development environments. **Winsoft Optical Barcode Recognition for FireMonkey** also includes access to the source code, empowering developers with customization capabilities. With royalty-free distribution in applications, developers can seamlessly integrate barcode recognition functionality into their FireMonkey applications without licensing concerns.

Key Features of **Winsoft Optical Barcode Recognition for FireMonkey** :

1. Optical barcode recognition component for FireMonkey in Delphi and C++ Builder
2. Utilizes the ZBar barcode reader library for seamless integration
3. Supports a wide range of barcode symbologies including EAN-13/UPC-A, EAN-8, UPC-E, Code 39, Code 93, Code
