Deep Mood Lightroom Desktop and Mobile Presets and Photoshop Filters ACR

- 1 . Presets for Lightroom and Photoshop (.xmp File)
- 1. Presets that works with Mobile Lightroom (.dng file)
- 1. Presets for the Old Desktop Lightroom (.lrtemplate file)

The best way to use these presets is for outdoor photos, portraits, and imaginative photos. Each preset was created by an experienced photographer. It will look stunning with a range of photos.

- Each result will differ with each image. The reason for this is determined by the colors and tones, lighting, etc. in the original photograph.
- After applying the presets ensure that you play with the following parameters: exposure and temperature and contrast and shadows. Also, you can play with whites
- If you're looking to lighten your skin tone or reduce brown, experiment with the intensity of the orange color in the section of color
