Pack of Presets For Lightroom:

- 18 High-quality Color designs(include Split Toning curvatures, colors, and curves work)
- 10 for daylight
- 8 for the night
- 7 Curves that can be used to add the color style or by itself
- 3 Textures, similar to the previous pack of presets, these texture is designed to add a pixelated and cinematic feel to your images
- 4 Tones, ready to be used in conjunction with other presets, are available to provide you with an idea of how to edit
- It works is compatible with Mac and Windows Versions of Lightroom desktop as well as mobile (date 2021), Camera Raw, and Photoshop (made using Lightroom Classic 9.4 Raw12.4). Raw12.4).
- The file format XMP is used.
- Presets are compatible with Jpeg and Raw files. However, I suggest using Raw files for the highest quality and best results.
- These presets were created to serve as a base to edit your images, but I recommend you modify the settings when needed. Each image is not the same.
- If you'd like to utilize the presets using the Lightroom Mobile app, you must first install the presets into Lightroom and then sync them to any mobile phone.

HOW TO INSTALL

Open Lightroom go to the Develop module and locate the Presets Panel on the left side.

Click the “+” Icon on the right side of the panel and select the Import Presets option

Navigate to the location on your computer where you saved the file with the presets, select the file, and click the Import button

What is Cinematic Colors Presets?

Cinematic color presets refer to pre-designed settings or filters used in various software applications, particularly in photo and video editing software, to achieve a specific cinematic look and feel in images and footage. These presets are created
