Remember the old days when your VHS player gets clogged with spaghetti tape? Or if you stocked up like a freak on MiniDV tapes before the holidays? We're ancient and that's what we do! Since we miss the moment of carefree home video, we wanted to revive the look of that age at least.

We have attempted to digitize all the textures that took you back to the 90s for our Analog Video Kit. We scanned and replicated original Viewfinder overlays, screen statics, glitches, mad 90s filters, and retro home video pre-rolls using some of Daddy's cameras and players. All come in genuine 4:3 HD and with a sound design of high quality.

We know there are a lot of these packs out there, but you get the entire nostalgic bite with us alone. Our pre-keyed drag and drop viewfinder overlays can not be found anywhere else. With our Video Sounds, Bugs, Pre Rolls, and AV Look Adapter mix them and you can replicate the wedding tape of your parents.

### GET THE FULL ANALOG NOSTALGIA

This kit provides you with the real thing. From various cameras and VCR decks, we extracted five distinct analog video statics and 15 glitch properties. Our true pre-keyed drag-and-drop viewfinder overlays are not available anywhere else for recording and replay overlays.

To recreate a realistic tube television experience, use the still overlays and Retro pre-roll text assets. Your footage will be taken with the pre-built Premiere Pro timelines for the initial Analog Video Look, Star Filter, and the vertical analog streaks get the most intense 90s feeling.

### THIS PACK WORKS WITH BLEND MODES

Using our Analog Video Kit for any blend-mode software. Both the big tools for editing does this. Premiere, Final Cut, After Impact, Sony Vegas, Davinci Resolve, and much more! Please note that at the moment) our Analog Video Look, Star Filter, and Vertical Streak Filter are only available for Premiere Pro.

For your eyes and your ears, a bite Each clip in the Analog Video Kit comes with a special high-quality sound for this bundle, as with most of our assets, to ease your workflow.
